Ex 11 b)

RIP Routing

Aim :

To configure RIP routing using cisco packet tracer.

Algorithm :

1. open cisco packet tracer
2. Create the required router and pc topology
3. Connect the devices using suitables cables.
4. Assign Ip address to pc and router interface
5. Enable router interface using no shutdown
6. Add the connected networks using network commands.
7. Configure RIP on the required routers.
8. Check the routing table.
9. Test Connectivity using ping.

Result :

Thus, RIP routing was successfully Configured and Connectivity between networks was verified.
