Ex 12 a) ECHO CLIENT - SERVER

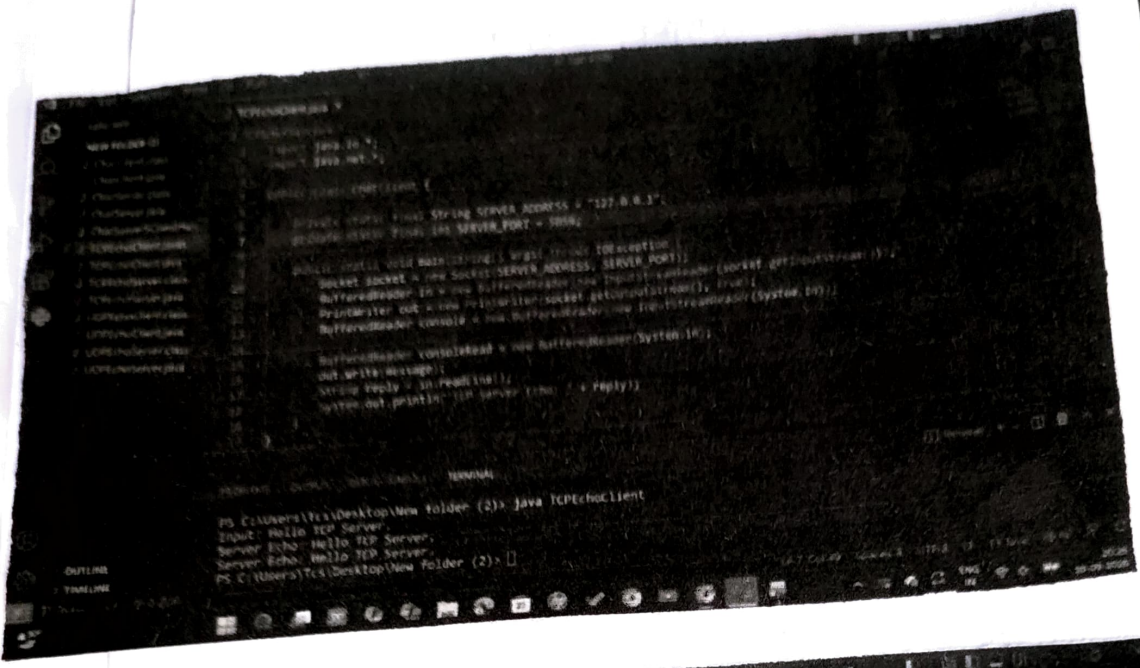

AIM:

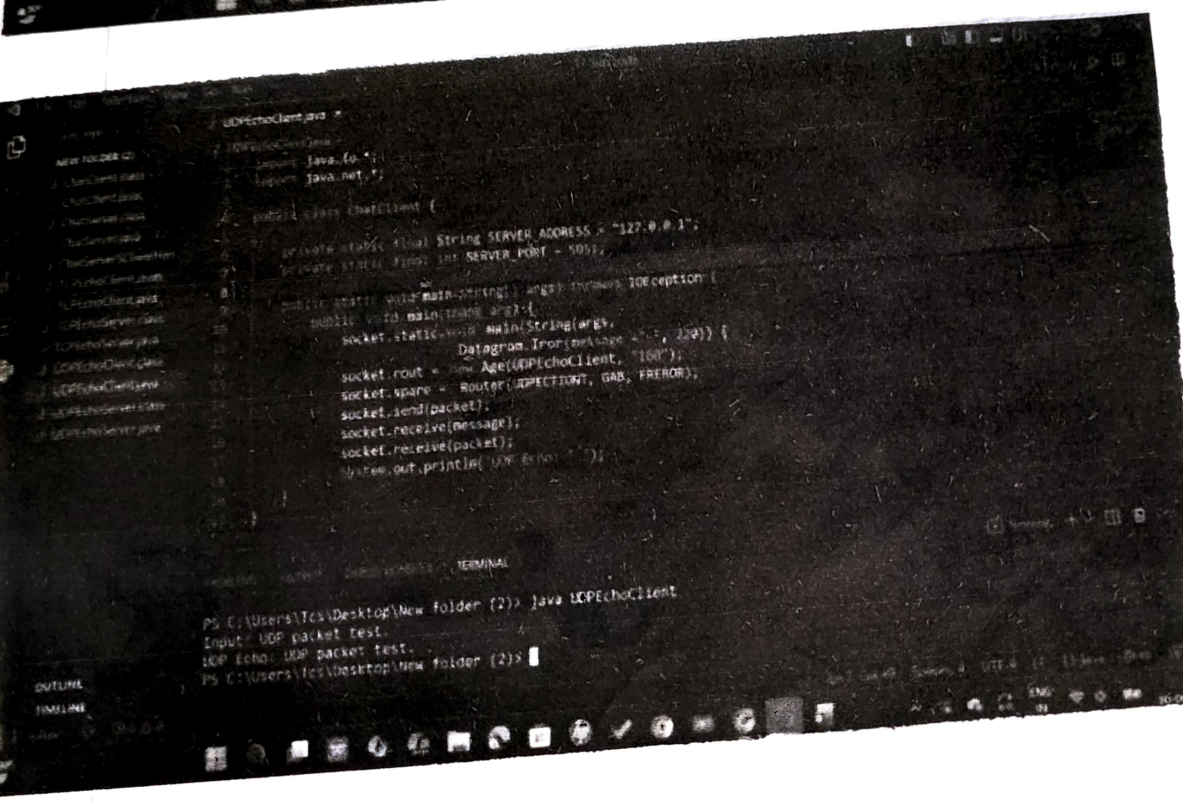

To implent an echo client-server using Tcp / UDP sockets.

Algorithm:

* create the server socket
* Bind the socket to an Ip address, port
* Start listining for client reqts.
* create the client socket
* Connect the client to server
* Send message to server
* Server receives and echos the messages
* Close the sockets.

Result:

Thus, the echo client - Server was Succ

implemented using Sockets.
