EX12 b)

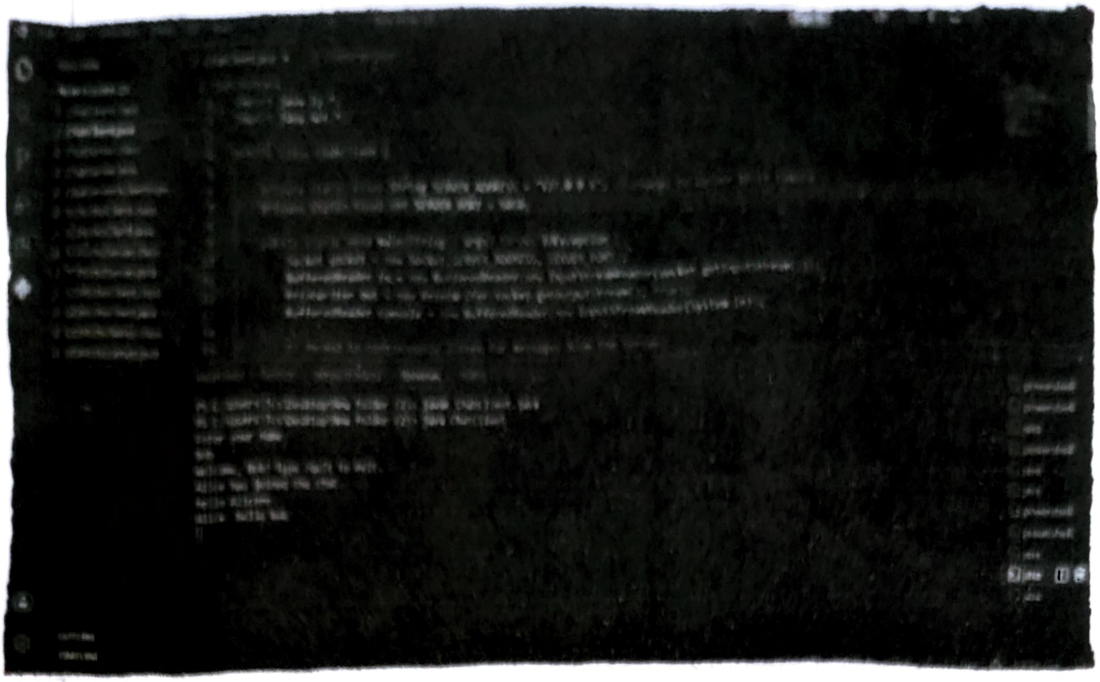

CHAT - CLIENT SERVER

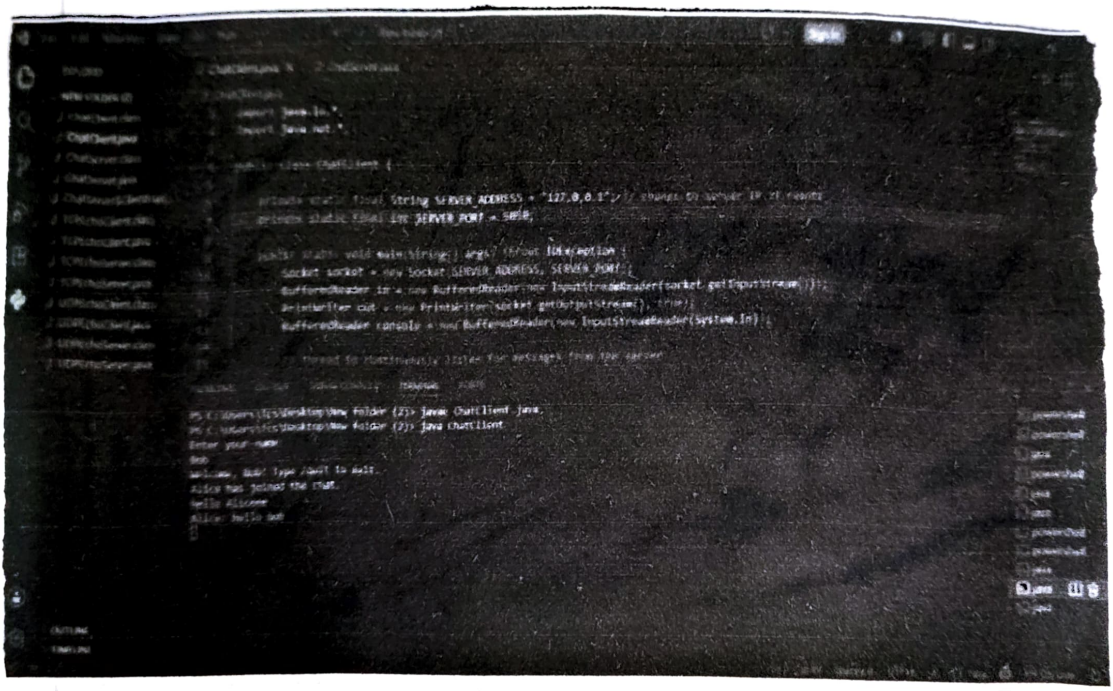

Aim:

To implement a chat program using socket

Algorithm:

1. create server socket
2. Bind the socket to an IP address and port.
3. start listening for a client
4. create the client socket
5. Establish connection between client and server.
6. Enter a message from the client.
7. Display the recived message
8. Continue communication until termination
9. close the sockets.

Result:

Thus the chat client-server was successfully implemented using socket programming
