Exp - 2 ~~Computer Network~~

Different types of Network cables.

a) understand different types of network cable

Different type of cables used in networking are:

1. Unshielded Twisted (UTP) cable
2. Shielded Twisted pair (STP) cable
3. Coxial Cable
4. fibre optic cable

UTP:

Category	Max data Transmission	use
category 3	10 bs	10 Base-T Ethernet
category 5	upto 100 Mbps	Fast Ethernet, Gigabit Ethernet
category 5e	1 Gbps	fast Ethernet Gigabit Ethernet

STp:

Category 6, 6a	10 Gbps	Gigabit Ethernet 10G Ethernet (55M) widely used in data Centres

b) Make your own Ethernet Cross cable

Tools and parts needed:

* CAT5, | CAT 5e
* Crimping tool
* Tool RJ45 Connectors
* Avg Shields

Step 1: To start Construction of the device begin by threading Sheilds onto the cable

Step 2: Next, Strip approx 1.5cm of Cable Shielding from both ends the crimp tool has round area to complete this task.

Step 3: The four wire pairs and arrange them according to A and B

Step 4: Straighten and trim the wire then insert them into the RJ45 Connect

Step 5: Push the wire fully into the RJ45 plug.

Step 6: Insert the plug into the crimping tool & crimp it

Step 7: Repeat the same process on the other end using B for over end & A for straight through cable.

Result: Thus different types of network Cable used in networking are studied.
